SUMMARY

Engineering leader with 12+ years building and scaling backend and mobile products, including 4+ years managing engineering teams. Comfortable moving between hands-on technical work and org-level planning, with a track record of shipping products end-to-end and growing engineers into senior and lead roles.

EXPERIENCE

Engineering Manager

Acme Systems | Mar 2021 - Present | Portland, USA

Lead a team responsible for the company's core customer-facing platform.

Achievements

- Grew the team from 4 to 12 engineers while maintaining delivery velocity, introducing a structured onboarding program and clearer ownership boundaries between sub-teams.
- Led the migration of a legacy monolith to a service-oriented architecture, cutting average deploy time from 45 minutes to 6 minutes.
- Partnered with product and design on quarterly roadmap planning and owned the team's operating budget.

Senior Software Engineer

Acme Systems | Jun 2018 - Mar 2021 | Portland, USA

- Designed and built a notifications service handling millions of daily events, reducing delivery latency by 60%.
- Mentored three junior engineers, two of whom were promoted to senior roles.

Software Engineer

Example Labs | Jul 2014 - May 2018 | Austin, USA

- Built and maintained REST APIs and background processing pipelines for a consumer-facing mobile app with over 1M active users.
- Contributed to a client-side rewrite that improved app store rating from 3.2 to 4.5 stars.

EDUCATION

Example State University 2010 - 2014

Bachelor of Science, Computer Science | Austin, USA
